

Directional spool valve type WMM 5 hand lever operated

31,5 MPa

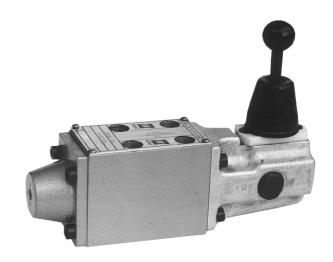

16 dm³/min

WK 450 202

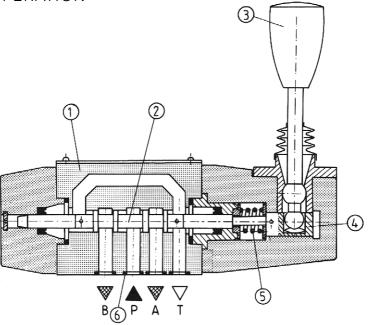

04 1999

Directional spool valves are used to control the direction of fluid flow and thus the direction of movement or holding position of a user (cylinder or hydraulic motor).

Size 5

DESCRIPTION OF OPERATION

-1-

Annular ports are made around the longitudinal bore in the housing 1. The annular ports cut through the longitudinal bore forming control lands in the housing. The moveable control spool 2 is placed in the main port. If the spool is shifted, it connects or separates the ports in the housing. Various control functions result directly from shape of the control spool.

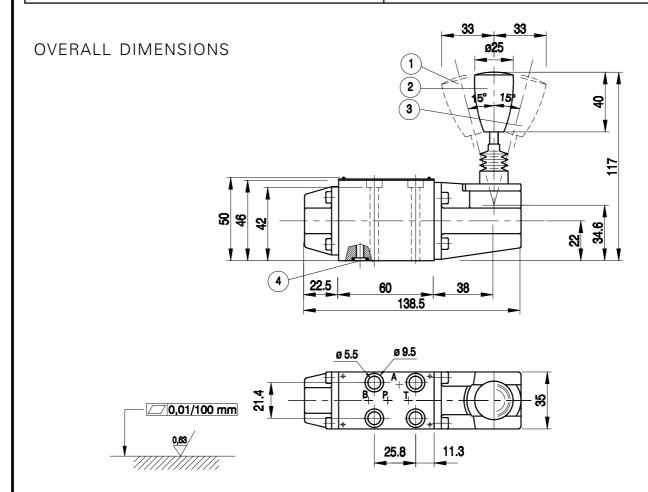

The movement of the spool results from a change in the position of the hand lever 3 with which the pin 4 is combined

The directional valve is available with centering spring $5\,$ or with detent.

Sealing of the directional valve to a subplate is achieved by means of suitable rings 6.

TECHNICAL DATA

Hydraulic fluid	Mineral oil, phosphate ester		
Required filtration	up to 16 μm		
Recommended filtration	up to 10 μm		
Nominal fluid viscosity	37 mm² at temp. of 328 K		
Viscosity range	2.8 to 380 mm²/s		
Optimum working temperature (fluid in a tank)	313 - 328 K		
Fluid temperature range	243 - 343 K		
Maximum operating pressure	Port P, A, B Port T		
	31.5 MPa 6 MPa		
Flow section in position ,,0"	Spool type W Spool type Q		
	3 % of nominal section 6 % of nominal section		
Weight	1 kg		

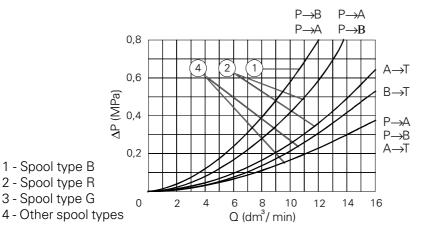

Admissible surface roughness and flatness deviation for a subplate face

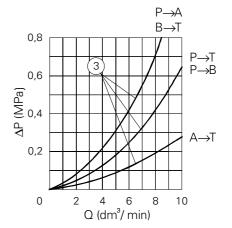

- ${\bf 1}$ Position ,,,b $^{\prime\prime}$ for three-position directional valves and two-position spool N/OF

- 4 O-ring 7 × 1.5 4 pieces

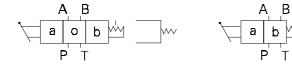

WK 450 202 - 2 -

PERFORMANCE CURVES : measured at ν = 41 mm²/s and T = 323 K

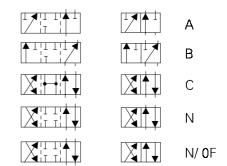

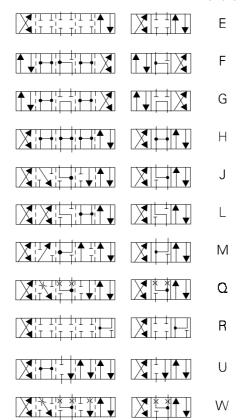

SCHEMES

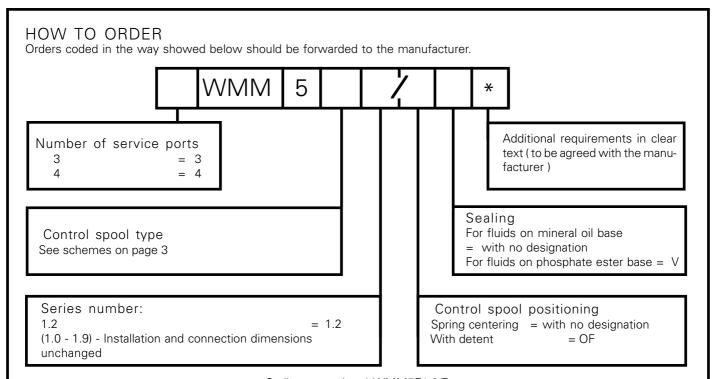

Scheme for directional valve two- or three-position, manually operated.

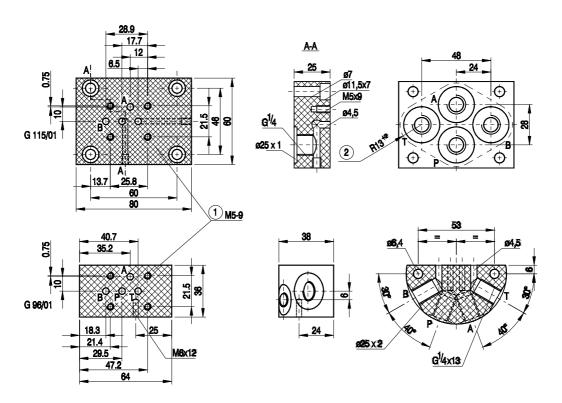

Schemes for control spools and their overlap positions.

Coding example: 4 WMM5E1.2/F

MOUNTING DIMENSIONS FOR SUBPLATE

- 1 Mounting face
- 2 Recess in subplate face

Note: Subplate and mounting bolts must be ordered separately

Bolts mounting valve to subplate	Torque	
4×M5×50-10.9 per PN-74/M-82302 (DIN 912)	9 Nm	

Subplate weight - approx. 0.7 kg
